

Expert Forensic Engineering Solutions

Expert analysis and engineering consulting for mechanical systems in complex facilities.

Consulting Services

Services include peer review, conceptual design, and development of strategies and programs for expedited project delivery.

Bill frequently acts as an owner's agent as an extension of the owner's project team. On other projects, Bill serves as a subject matter expert assisting project delivery firms in development of viable solutions and review of construction documents.

As a project consultant, Bill assures the project starts right and provides expertise through completion and operation to maximize return on investment.

Bill's pragmatic approach to litigation consulting and project consulting is based on more than 40 years of real-world experience as a design professional, mentor, forensic analyst, and years as an instructor in professional and academic settings.
