

HIMAD BEG, P.E.

IN BRIEF

Himad Beg, a native of New York, is a graduate Civil Engineer and licensed Professional Engineer with over 16 years of experience in the dual fields of Forensic Engineering and Construction Management. In the realm of Forensic Engineering, Mr. Beg has performed site investigations and inspections and authored Engineering Reports on numerous premises and product liability cases. As a Construction Manager, he has managed over \$600 million dollars of critical infrastructure construction and rehabilitation for government agencies in New York and New Jersey. Key responsibilities have been to ensure Contractor Code Compliance, Quality Control and Site Safety. Mr. Beg has provided Expert Witness testimony at trial in court and at depositions.
